Subject: Re: ND DEQ WQS revisions - response to "bubble comment"

Thanks Pete.

The messages I tried sending Karl yesterday kept bouncing back. I fixed his email address in my contact list and manually typed in his email address... but the email messages kept coming back undeliverable.

Talk to you soon.

Holly

Subject: FW: ND DEQ WQS revisions - response to "bubble comment"

This got kicked back. I believe Holly received it but Karl did not.

Dear Holly:

Plan to include/add the "instantaneous footnote".

Pete

Hi Pete, I forgot to ask you and Karl your opinion on EPA Office of Water's "bubble" comments made in Table 1 (to selenium in fish flesh) regarding frequency and duration of fish tissue numbers, and a footnote that should be attached to instantaneous measurement.

Any thoughts?

Thanks. I hope your back feels better soon!

Holly

Subject: RE: ND DEQ WQS revisions - suggested language for footnotes related to selenium

Dear Holly:

Initial impression "this is good". I will run it by Karl.

Thanks for all your help.

Pete

Hi Pete, I hope all is well!

I know your plate is full so I'll be brief. Per our conversation on Monday, attached for your review are EPA's recommended revisions to footnote 4 in Table 1 and footnote 17 in Table 2. Please let me know if you have any comments or questions.

Also, I'm putting together a summary of the discussion on Monday with NDDEQ and Office of Water. I'll send it to you once I'm done to make sure I accurately captured the discussion. I intended to send it today, but work keeps getting in the way LOL...

Thanks so much! Talk with you soon.
